SLC, Utah 84114-5801

RE: Application for Permit to Drill-
Ritzakis 5-305, SE/4,SE/4, of Sect.5
T14S, R9E, SLB & M, Carbon County, Utah

Dear Mr. Baza:

Enclosed is the original of the *Application for Permit to Drill* (APD) and a Sundry Notice (requesting exception to spacing) for the above named well. Included with the APD is the following information:

- Exhibit "A"- Survey plat of the proposed well site;
- Exhibit "B" - Proposed Location Map with Pipeline, Power, and Road Access;
- Exhibit "C" - Location Layout;
- Exhibit "D" - Drilling Information;
- Exhibit "E" - Multipoint Surface Use Plan;
- Exhibit "F" - Typical Road Cross-section;
- Exhibit "G" - BOP Diagram;
- Exhibit "H"- Production Site Layout; and
- Exhibit "I"- Evidence of Bond;

Proposed gas, water, and utility line routes from the wellsite are shown in Exhibit "B", but are subject to change if requested by the land owner or his/her representative.

Please accept this letter as River Gas Corporation's written request for confidential treatment of all information contained in and pertaining to this permit application, if said information is eligible for such consideration.

Thank you very much for your timely consideration of this application. Please feel free to contact me if you have any questions.

Sincerely,

Don S. Hamilton

Don S. Hamilton

EXHIBIT "D"
DRILLING PROGRAM

Attached to UDOGM Form 3
River Gas Corp.
Ritzakis 5-305
SE/4,SE/4, Sect.5, T14S, R9E,SLB&M
1104' FSL & 1196' FEL
Carbon County, Utah

1. The Geologic Surface Formation

Upper Mancos Shale

2. Estimated Tops of Important Geologic Markers

Blue Gate/Ferron 2810'

3. Projected Gas & H2O zones (Ferron Formation)

Coals and sandstones - 2835'-2980'

No groundwater is expected to be encountered.

Casing & cementing will be done to protect potentially productive hydrocarbons, lost circulation zones, abnormal pressure zones, and prospectively valuable mineral deposits. All indications of usable water will be reported.

Surface casing will be tested to 1400 psi.

4. The Proposed Casing and Cementing Programs

<u>HOLE SIZE</u>	<u>SETTING DEPTH (INTERVAL)</u>	<u>SIZE (OD)</u>	<u>WEIGHT, GRADE & JOINT</u>	<u>NEW, USED</u>
14"	25'	12-1/4"	Conductor	New
11"	372'	8-5/8"	24#	New
7-7/8"	3720'	5-1/2"	17#	New

Cement Program

Surface Casing: 149 sks G+2%CaCl+1/4#per sack flocel;15.8#/gal,density,
1.15 cu.ft/sk yield.

Production Casing: 343 sks 50/50 poz 8%gel +2%CaCl+10%extender;12.5#/gal,
density, 1.92 cu.ft/sk yield.

75 sks "G" thixotropic, 14.2#/gal density, 1.61 cu.ft/sk yield.

The following shall be entered in the driller's log:

- 1) Blowout preventer pressure tests, including test pressures and results;
- 2) Blowout preventer tests for proper functioning;
- 3) Blowout prevention drills conducted;
- 4) Casing run, including size, grade, weight, and depth set;
- 5) How the pipe was cemented, including amount of cement, type, whether cement circulated, location of the cementing tools, etc.;
- 6) Waiting on cement time for each casing string;
- 7) Casing pressure tests after cementing, including test pressures and results.

5. The Operator's Minimum Specifications for Pressure Control

Exhibit "G" is a schematic diagram of the blowout preventer equipment. A double gate 3000 psi BOPE will be used with a rotating head. This equipment will be tested to 2000 psi. All tests will be recorded in a Driller's Report Book. Physical operation of BOP's will be checked on each trip.

6. The Type and Characteristics of the Proposed Circulating Muds

0-300	11" hole	Drill with air, will mud-up if necessary.
300-TD	7 7/8" hole	Drill with air. 400 psi @ 1500-1800 Scf.

7. The Testing, Logging and Coring Programs are as followed

300-TD	Gamma Ray, Density, Neutron Porosity, Induction, Caliper
--------	--

Any Anticipated Abnormal Pressures or Temperatures

No abnormal pressures or temperatures have been noted or reported in wells drilled in the area nor at the depths anticipated in this well. Bottom hole pressure expected is 1400 psi max. No hydrogen sulfide or other hazardous gases or fluids have been found, reported or are known to exist at these depths in the area.

8. Anticipated Starting Date and Duration of the Operations.

The well will be drilled approx: September 1998.

Verbal and/or written notifications listed below shall be submitted in accordance with instructions from the Division of Oil, Gas & Mining:

- (a) prior to beginning construction;
- (b) prior to spudding;
- (c) prior to running any casing or BOP tests;
- (d) prior to plugging the well, for verbal plugging instructions.

Spills, blowouts, fires, leaks, accidents or other unusual occurrences shall be reported to the Division of Oil, Gas & Mining immediately.

Exhibit "E"

Multipoint Surface Use Plan

Attached to Form 3
River Gas Corp.
Ritzakis 5-305
SE/4, SE/4, Sec. 5, T14S, R9E, SLB & M
1104' FSL, 1196' FEL
Carbon County, Utah

1. Existing Roads

- A. We do not plan to change, alter or improve upon any existing state or county roads. Existing roads will be maintained in the same or better condition. See Exhibit "B".

2. Planned Access

Approximately 5700' of new access is required (See Exhibit "B")

- a. Maximum Width: 14' travel surface with 27' base
- b. Maximum grade: 10%
- c. Turnouts: None
- d. Drainage design: 11 culverts may be required. Water will be diverted around well pad as necessary.
- e. If the well is productive, the road will be surfaced and maintained as necessary to prevent soil erosion and accommodate year-round traffic.

3. Location of Existing Wells

- a. See Exhibit "B". There are eight proposed and no existing wells within a one mile radius of the proposed location.

4. Location of Existing and/or Proposed Facilities

- a. If the well is a producer, installation of production facilities will be as shown on Exhibit "H". Buried powerlines run along access on the east and north, gathering lines on the south or west.
- b. Rehabilitation of all pad areas not used for production facilities will be made in accordance with landowner stipulations.

5. Location and Type of Water Supply

- a. Water to be used for drilling will be purchased from the Price River Water Improvement District (PRWID) (tel. 801-637-6350). **Public Water Source*
- b. Water will be transported by truck over approved access roads.
- c. No water well is to be drilled for this location.

6. Source of Construction Materials

- a. Any necessary construction materials needed will be obtained locally and hauled to the location on existing roads.
- b. No construction or surfacing materials will be taken from Federal/Indian land.

7. Methods for handling waste disposal

- a. As the well will be air drilled, a small reserve pit will be constructed with a minimum of one-half the total depth below the original ground surface on the lowest point within the pit. The pit will not be lined unless conditions encountered during construction warrant it or if deemed necessary by the DOGM representative during the pre-site inspection. Three sides of the reserve pit will be fenced within 24 hours after completion of construction and the fourth side within 24 hours after drilling operation cease with four strands of barbed wire, or woven wire topped with barbed wire to a height of not less than four feet. The fence will be kept in good repair while the pit is drying.
- b. Following drilling, the liquid waste will be evaporated from the pit and the pit backfilled and returned to natural grade. No liquid hydrocarbons will be discharged to the reserve pit or location.
- c. In the event fluids are produced, any oil will be retained in tankage until sold and any water produced will be retained until its quality can be determined. The quality and quantity of the water will determine the method of disposal.
- d. Trash will be contained in a portable metal container and will be hauled from location periodically and disposed of at an approved disposal site. Chemical toilets will be placed on location and sewage will be disposed of at an appropriate disposal site.

8. Ancillary Facilities

- a. We anticipate no need for ancillary facilities with the exception of one trailers to be located on the drill site.

9. Wellsite Layout

- a. Available topsoil will be removed from the location and stockpiled. Location of mud tanks, reserve and berm pits, and soil stockpiles will be located as shown on the attachments.
- b. A blooie pit will be located 100' from the drill hole. A line will be placed on the surface from the center hole to the berm it. The berm pit will not be lined, but will be fenced on four sides to protect livestock/wildlife.
- c. Access to the well pad will be as shown on Exhibit "B".
- d. Natural runoff will be diverted around the well pad.

10. Plans for Restoration of Surface

- a. All surface areas not required for producing operations will be graded to as near original condition as possible and contoured to maintain possible erosion to a minimum.
- b. Available topsoil will be stockpiled and will be evenly distributed over the disturbed areas and the area will be reseeded as prescribed by the landowner.
- c. Pits and any other area that would present a hazard to wildlife or livestock will be fenced off when the rig is released and removed.
- d. Any oil accumulation on the pit will be removed or overhead flagged as dictated by then existed conditions.
- e. Rehabilitation will commence following completion of the well. Rat and mouse holes will be filled immediately upon release of the drilling rig from the location. If the wellsite is to be abandoned, all disturbed areas will be recontoured to the natural contour as is possible.

11. Surface Ownership

- a. The wellsite and access road will be constructed on lands administered by the Bureau of Land Management (435) 637-3608. The operator shall contact the landowner and the Division of Oil, Gas and Mining 48 hours prior to beginning construction activities.

12. **Other Information:**

The primary surface use is grazing. The nearest dwelling is approximately 3 miles southeast. Nearest live water is Gordon Creek 8500' southeast.

If there is snow on the ground when construction begins, it will be removed before the soil is disturbed. And piled downhill from the topsoil stockpile location.

The backslope and foreslope will be constructed no steeper than 4:1.

All equipment and vehicles will be confined to the access road and well pad.

A complete copy of the approved Application for Permit to Drill (APD) including conditions and stipulations, shall be on the wellsite during construction and drilling operations.

There will be no deviation from the proposed drilling and/or workover program without prior approval from the Division of Oil, Gas & Mining.

DIVISION OF OIL, GAS AND MINING
APPLICATION FOR PERMIT TO DRILL
STATEMENT OF BASIS

Operator Name: River Gas Corporation

Name & Number: Ritzakis 5-305

API Number: 4300730474

Location: 1/4, 1/4 SESE Sec. 5 T. 14S R. 9E

Geology/Ground Water:

There are no aquifers of high quality ground water expected to be encountered. Garley Canyon Ss. Beds of the Blue Gate Shale Member of the Mancos Shale may be present at this location. If the Garley Canyon Beds are present (probable) and wet (possible - standing water in upper Garley Canyon Beds ~3.5 miles south in Pinnacle Canyon), both beds should be included within the proposed surface casing string. The operator is informed of the potential for wet Garley Canyon Beds and will respond to protect the zone by extending the surface casing string as needed to protect the beds. The proposed casing and cement program will adequately isolate any zones of water penetrated.

Reviewer: C. Kierst

Date: 10/21/98

Surface:

The sandy, moderately-permeable soil is developed on the Blue Gate Shale suprajacent to the Garley Canyon Beds. The Garley Canyon Beds are likely to be wet at this location because of the presence of a water well ~3500' NNE in adjacent Section 4 which is allowed 0.1 CFS and is probably completed in the Garley Canyon Ss. at a depth of 150'. The nearest moving surface waters are in Gordon Creek (1 mile southeast). There are no nearby culinary or irrigation water supply wells other than the earlier referenced well.

Reviewer: Chris Kierst

Date: 10/21/98

Conditions of Approval/Application for Permit to Drill:

1) Extend surface casing as needed to contain any water in Garley Canyon Beds.

by: Department of Natural Resources

Date: October 26, 1998
State of Utah

ENGINEERING STIPULATIONS: Conductor and surface casing shall be cemented to surface.

Collapse strength is based on the Westcott, Dunlop & Kemler method of biaxial correction for tension.

Collapse is based on a vertical depth of 372 ft, a mud weight of 8.33 ppg An internal gradient of .217 psi/ft was used for collapse from TD to 0 ft.

Burst strength is not adjusted for tension.

Engineering responsibility for use of this design will be that of the purchaser.

Re: Application for Transportation & Utility Systems on Federal Lands for wellsites on the Ritzakis mineral estate, Sections 5, and 8, T.14S., R.9E., SLB&M, Carbon County, Utah.

Dear Ms. Hubert:

Enclosed is the original of the *Application for Transportation, Utility Systems & Facilities on Federal Lands* for the above named wellsite in which an onsite was conducted on July 17, 1998. Processing fees, when determined, will be forwarded to your office. Included with the application is a *Plan of Development* with the following information:

Attachment "A" Survey Plat, Location Layout, Cross Section and Map- Ritzakis 05-304
Attachment "B" Survey Plat, Location Layout, Cross Section and Map- Ritzakis 05-305
Attachment "C" Survey Plat, Location Layout, Cross Section and Map- Ritzakis 08-298
Attachment "D" Survey Plat, Location Layout, Cross Section and Map- Ritzakis 08-299
Attachment "E" Survey Plat, Location Layout, Cross Section and Map- Ritzakis 08-300

Please accept this letter as River Gas Corporation's written request for confidential treatment of all information contained in and pertaining to this application, if said information is eligible for such consideration.

Thank you very much for the your timely consideration of this application. Please feel free to contact me if you have any questions or require additional clarification.

Sincerely,

Don S. Hamilton

APPLICATION FOR TRANSPORTATION AND
UTILITY SYSTEMS AND FACILITIES
ON FEDERAL LANDS

FORM APPROVED
OMB NO. 1004-0060
Expires: August 31, 1998

FOR AGENCY USE ONLY

NOTE: Before completing and filing the application, the applicant should completely review this package and schedule a preapplication meeting with representatives of the agency responsible for processing the application. Each agency may have specific and unique requirements to be met in preparing and processing the application. Many times, with the help of the agency representative, the application can be completed at the preapplication meeting.

Application Number

Date filed

1. Name and address of applicant (include zip code)
River Gas Corporation
1305 So. 100 E.
Price, Utah 84501

2. Name, title, and address of authorized agent if different from
item 1 (Include zip code)
Don S. Hamilton
Permit Specialist

3. TELEPHONE (Area code)
Applicant
(435) 637-8876

Authorized Agent
(435) 637-8876

4. As applicant are you? (Check one)

- a. ☐ Individual
b. ☒ Corporation*
c. ☐ Partnership/Association*
d. ☐ State Government/State Agency
e. ☐ Local Government
f. ☐ Federal Agency

* If checked, complete supplemental page

5. Specify what application is for: (Check one)

- a. ☒ New authorization
b. ☐ Renewing existing authorization No.
c. ☐ Amend existing authorization No.
d. ☐ Assign existing authorization No.
e. ☐ Existing use for which no authorization has been received*
f. ☐ Other*

* If checked, provide details under Item 7

6. If an individual, or partnership, are you a citizen(s) of the United States? ☐ Yes ☐ No

7. Project description (describe in detail): (a) Type of system or facility, (e.g., canal, pipeline, road); (b) related structures and facilities; (c) physical specifications (length, width, grading, etc.); (d) term of years needed; (e) time of year of use or operation; (f) Volume or amount of product to be transported; (g) duration and timing of construction; and (h) temporary work areas needed for construction (Attach additional sheets, if additional space is needed.)

See Attached Plan of Development

8. Attach a map covering area and show location of project proposal See Attachment "A"

9. State or local government approval: ☐ Attached ☐ Applied for ☒ Not required

10. Nonreturnable application fee: ☐ Attached ☐ Not required ☒ To Be Determined

11. Does project cross international boundary or affect international waterways? ☐ Yes ☒ No (If "yes" indicate on map)

12. Give statement of your technical and financial capability to construct, operate, maintain, and terminate system for which authorization is being requested.

(Continued on reverse) This form is authorized for local reproduction.

13a. Describe other reasonable alternative routes and modes considered.

This was the most reasonable alternative to minimize surface disturbance, & wildlife impacts.

b. Why were these alternatives not selected?

N/A

c. Give explanation as to why it is necessary to cross Federal Lands.

To access and develop federal oil & gas leases.

14. List authorizations and pending applications filed for similar projects which may provide information to the authorizing agency. (Specify number, date, code, or name)

N/A

15. Provide statement of need for project, including the economic feasibility and items such as: (s) cost of proposal (construction, operation and maintenance), (b) estimated cost of next best alternative; and (c) expected public benefits.

See Attached Plan of Development

16. Describe probable effects on the population in the area, including the social and economic aspects, and the rural lifestyles.

See Attached Plan of Development

17. Describe likely environmental effects that the proposed project will have on: (a) air quality; (b) visual impact; (c) surface and ground water quality and quantity; (d) the control or structural change on any stream or other body of water; (e) existing noise levels; and (f) the surface of the land, including vegetation, permafrost, soil, and soil stability.

N/A

18. Describe the probable effects that the proposed project will have on (a) populations of fish, plantlife, wildlife and marine life, including threatened and endangered species; and (b) marine mammals, including hunting, capturing, collecting, or killing these animals.

N/A

19. State whether any hazardous material, as defined in this paragraph, will be used, produced, transported or stored on or within the right-of-way or any of the right-of-way facilities, or used in the construction, operation, maintenance or termination of the right-of-way or any of its facilities. "Hazardous material" means any substance, pollutant or contaminant that is listed as hazardous under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. 9601 et seq., and its regulations. The definition of hazardous substances under CERCLA includes any "hazardous waste" as defined in the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, 42 U.S.C. 9601 et. seq. The term does not include petroleum, including crude oil or any fraction thereof that is not otherwise specifically listed or designated as a hazardous substance under CERCLA Section 101(14), 41 U.S.C. 9601(14), nor does the term include natural gas.

No hazardous materials, as defined, will be used, produced, transported or stored within the right-of-way.

20. Name all the Department(s) /Agency(ies) where this application is being filed.

I HEREBY CERTIFY, That I am of legal age and authorized to do business in the State and that I have personally examined the information contained in the application and believe that the information submitted is correct to the best of my knowledge.

Signature of Applicant

*Don S. Hamilton*Date *9-8-78*

Title 18, U.S.C. Section 1001, makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious, or fraudulent statements or representations as to any matter within its jurisdiction.

SUPPLEMENTAL

NOTE: The responsible agency (ies) will provide additional instructions

CHECK APPROPRIATE BLOCK

I - PRIVATE CORPORATIONS

III - PARTNERSHIP OR OTHER UNINCORPORATED ENTITY

a. Articles of association, if any

b. If one partner is authorized to sign, resolution authorizing action is

c. Name and address of each participant, partner, association, or other

d. If application is for an oil or gas pipeline, provide information required by Item "I-f" and "I-g" above.

* If the required information is already filed with the agency processing this application and is current, check block entitled "Filed." Provide the file identification information (e.g., number, date, code, name). If not on file or current, attach the requested information.

The Privacy Act of 1974 provides that you be furnished the following information in connection with information required by this application for an authorization.

AUTHORITY: 16 U.S.C. 310; 5 U.S.C. 301.

PRINCIPAL PURPOSE: The information is to be used to process the application.

ROUTINE USES: (1) The processing of the applicant's request for an authorization. (2) Documentation for public information. (3) Transfer to appropriate Federal agencies when concurrence is required prior to granting a right in public lands or resources. (4)(5) Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions.

voluntary. If all the information is not provided, the application may be rejected.

DATA COLLECTION STATEMENT

The Federal agencies collect this information from applicants requesting right-of-way, permit, license, lease, or certification for the use of Federal lands. The Federal agencies use this information to evaluate the applicant's proposal. The public is obligated to submit this form if they wish to obtain permission to sue Federal lands.

A reproducible copy of this form may be obtained from the Bureau of Land Management, Division of Lands, 1620 L Street, Rm. 204, Washington, D.C. 20036

APPLICATION FOR TRANSPORTATION AND UTILITY SYSTEMS
AND FACILITIES ON FEDERAL LANDS

GENERAL INFORMATION
ALASKA NATIONAL INTEREST LANDS

This application will be used when applying for a right-of-way, permit, license, lease, or certificate for the use of Federal lands which lie within conservation system units and National Recreation or Conservation Areas as defined in the Alaska National Interest Lands Conservation Act. Conservation system units include the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, and National Forest Monuments.

Transportation and utility systems and facility uses for which the application may be used are:

1. Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.
2. Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.
3. Pipelines, slurry and emulsion systems, and conveyor belts for transportation of solid materials.

Department of Transportation
Federal Aviation Administration
Alaska Region AAL-4,222 West 7th Ave., Box 14
Anchorage, Alaska 99513-7587
Telephone: (907) 271-5285

NOTE: The Department of Transportation has established the above central filing point for agencies within that Department. Affected agencies are: Federal Aviation Administration (FAA), Coast Guard (USCG), Federal Highway Administration (FHWA), Federal Railroad Administration (FRA).

OTHER THAN ALASKA NATIONAL INTEREST LANDS

Use of this form is not limited to National Interest Conservation Lands of Alaska.

Individual department/agencies may authorize the use of this form by applicants for transportation and utility systems and facilities on other Federal lands outside those areas described above.

For proposals located outside of Alaska, applications will be filed at the local agency office or at a location specified by the responsible Federal agency.

SPECIFIC INSTRUCTIONS
(Items not listed are self-explanatory)

- Item
- 7 Attach preliminary site and facility construction plans. The responsible agency will provide instructions whenever specific plans are required.
 - 8 Generally, the map must show the section(s), township(s) and range(s) within which the project is to be located. Show the proposed location of the project on the map as accurately as possible. Some agencies require detailed survey maps. The responsible agency will provide additional instructions.
 - 9, 10 and 12 - The responsible agency will provide additional instructions.
 - 13 Providing information on alternate routes and modes in as much detail as possible, discussing why certain routes or modes were rejected and why it is necessary to cross Federal lands will assist the agency (ies) in processing your application and reaching a final decision. Include only reasonable alternate routes and modes as related to current technology and economics.
 - 14 The responsible agency will provide instructions.
 - 15 Generally, a simple statement of the purpose of the proposal will be sufficient. However, major proposals located in critical or sensitive areas may require a full analysis with additional specific information. The responsible agency will provide additional instructions.
 - 16 through 19 - Providing this information in as much detail as possible will assist the Federal agency (ies) in processing the application and reaching a decision. When completing these items, you should use a sound judgement in furnishing relevant information. For example, if the project is not near a stream or other body of water, do not address this subject. The responsible agency will provide additional instructions.

Application must be signed by the applicant or applicant's authorized representative.

Public reporting burden for this form is estimated to vary from 30 minutes to 25 hours per response, with an average of 2 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management, (Alternate) Bureau Clearance Officer, (WO-873), 1849 C Street, N.W., Washington, D.C. 20040, and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

If additional space is needed to complete any item, please put the information on a separate sheet of paper and identify it as "Continuation of Item".

PLAN OF DEVELOPMENT

River Gas Corporation
Wellsite and Related Surface Facilities Easements
Sections 5, & 8, T.14S., R.9E., SLB&M, Carbon County, Utah

PURPOSE AND NEED FOR THE PROPOSED RIGHT-OF-WAY

The easements addressed in this *Plan of Development* are necessary to allow River Gas Corporation (RGC) to construct wellsites and related surface facilities in Sections 5, & 8, T.14S., R.9E., to accommodate the drilling, completing, production, and maintenance of five coalbed methane wells, (see Attachments "A" through "E"). The locations for five proposed wells, on private mineral and federal surface, are outside the Drunkards Wash Federal Unit. The easements would be used on a continuing basis to maintain the wells and related structures.

The requested easements would consist of a permanent disturbance for five well locations approximately 215' by 175' (0.86 acres) each, and a temporary disturbance for the pit of approximately 50' by 50' (.05 acres) each, for a total disturbed area of 4.61 acres on Federal surface. Attachments "A" through "E" shows survey plats, construction details, typical cross sections and maps of the five wellsites (including placement of the rig and emergency pit). The proposed easements would connect with rights-of-way on federal land for access, pipe and power corridors which will then connect to additional rights-of-way on private land.

PROJECT DESCRIPTION

Construction of the proposed wellsites and associate pits would take place in the Spring and Summer of 1999. During construction of the proposed wellsites, use of the following heavy equipment would be required: water trucks, graders, dozers, a track excavator, and a gravel truck. The construction crew would consist of six to eight persons including laborers, equipment operators, and supervisors. Once construction begins, work would continue during daylight hours (and into the night if necessary) throughout the construction months.

During the drilling and completion phase of each well, traffic on the wellsite would consist of frequent use by personnel and supply transport, bulldozers, graders, and water trucks. Large equipment such as the drilling rig, the completion rig, and the fracture treating equipment would be positioned on the wellsite once during the use of that equipment's respective project. Following the completion of the wells, utilization of the wellsite would be limited to the minimum necessary to maintain and service the wells.

Seasonal access to the wellsite would be year-round in order to maintain the wells in optimal condition.

Alternates to the proposed wellsites have been considered by RGC and determined to be less desirable by agents of the Bureau of Land Management because of surface disturbance and wildlife issues.

Permits are currently being prepared to drill the wells and a bond is being posted to insure satisfactory completion of the wells.

WILDLIFE CONCERNS

The wellsites are located in a wildlife area, big game corridor, big game security area, and are in an area of critical winter habitat for mule deer and critical winter and high value winter habitat for elk as identified in the Final Environmental Impact Statement (FEIS). RGC has

agreed to reclaim and revegetate the berms and reclaimed pit to further enhance habitat, and make reasonable efforts to mitigate for wildlife.

WELLSITE CONSTRUCTION

Design and construction of the wellsites would adhere to attachments "A" through "E" and BLM specifications. The top six inches of topsoil material will be removed from the location and stored in the perimeter berm until final reclamation. Pad construction materials will be obtained locally from a private owner. Immediately upon completion of the wells all equipment that is not necessary for the production of the wells will be removed.

The pits will be located as described in Attachments "A" through "E" and the pit walls will be sloped at no greater than 2 to 1. The pits will be located in cut material with at least 50% of the pit volume being below original ground level. Three sides of the pit will be fenced before drilling starts and the fourth side will be fenced as soon as drilling is completed and shall remain until the pit is reclaimed.

FACILITIES CONSTRUCTION

Included within each wellsite would be two buried pipelines and an electric power line. Of the two pipelines, one will be a 3" gas line and the others 4" water line. All pipelines would be constructed of high density, extra-high molecular weight polyethylene conforming to AWWA Standards.

The three-phase power line would be installed by RGC's contractor. Currently the contract for power line installation and maintenance is under negotiation and responsibility for the line would be assumed by whichever party performs the installation.

CONSTRUCTION PROCEDURE

Prior to the beginning of construction, the wellsites and pits would be pin-flagged and/or staked. Following the stakes, the construction crew would carve out a subgrade to a 1% slope, stockpiling 6" of topsoil. Construction equipment used during this phase of the project would include a grader, a bulldozer, a water truck, and a pipe fusion machine.

The pipeline trench would be excavated to a depth of five feet and a width of four feet. Both the water and gas lines would be lowered into the trench using either a frontend loader or a trackhoe. Valve assemblies would be installed onto lines, with manholes and guards placed around both. When ready to fill the trench, and if the fill material were unusually coarse, a finer local material would be bedded around the pipe prior to back filling to protect it from damage. The pipeline trench would then be back filled by pushing the fill material into the trench using either a grader, a loader, or a dozer.

A trench would then be excavated (five feet deep by four feet wide) for the electric cable. After the cable were lowered into the trench, back filling would then proceed as outlined above, taking care to avoid damaging the cable. One transformer will also be located on the location above the installed electrical cable.

After completion of the wellsite, the disturbed areas outside of the berm would be recontoured and reclaimed based on BLM recommendations. Reseeding would be done with a seed drill and disk using the BLM approved seed mixture. Fertilizer would be distributed using a broadcast spreader.

SAFETY

All OSHA, BLM, and DOGM safety requirements would be followed during the construction process. A 2" barricade, painted safety yellow, would surround each manhole for the valve assemblies.

STABILIZATION AND MAINTENANCE

Construction debris and trash would be gathered to a centrally located dumpster. The dumpster would be emptied as necessary and the trash to an approved site such as ECDC. A portable toilet would be provided during the construction process and would be hauled away following construction by the owner to his facility.

Maintenance of the wellsites would include (but would not be limited to) painting, grading, snow removal, soil stabilization, weed abatement, and reseeded when necessary. Sufficient culverts and erosion control structures would be included in the project to prevent excessive erosion.

Re: Application for Transportation & Utility Systems on Federal Lands for a road, pipe and power corridor to the Ritzakis mineral estate, Sections 5, 8, and 9, T.14S., R.9E., SLB&M, Carbon County, Utah.

Dear Ms. Hubert:

Enclosed is the original of the *Application for Transportation, Utility Systems & Facilities on Federal Lands* for the above named location in which an onsite was conducted on July 17, 1998. Processing fees, when determined, will be forwarded to your office. Included with the application is a *Plan of Development* with the following information:

Attachment "A" - Maps for the Proposed Right-of-Way;

Attachment "B" - Typical Construction Cross-section;

Attachment "C" - Typical Road Cross-section;

Please accept this letter as River Gas Corporation's written request for confidential treatment of all information contained in and pertaining to this application, if said information is eligible for such consideration.

Thank you very much for the your timely consideration of this application. Please feel free to contact me if you have any questions or require additional clarification.

Sincerely,

Don S. Hamilton

APPLICATION FOR TRANSPORTATION AND
UTILITY SYSTEMS AND FACILITIES
ON FEDERAL LANDS

FORM APPROVED
OMB NO. 1004-0060
Expires: August 31, 1998

FOR AGENCY USE ONLY

Application Number

Date filed

NOTE: Before completing and filing the application, the applicant should completely review this package and schedule a preapplication meeting with representatives of the agency responsible for processing the application. Each agency may have specific and unique requirements to be met in preparing and processing the application. Many times, with the help of the agency representative, the application can be completed at the preapplication meeting.

1. Name and address of applicant (include zip code)

River Gas Corporation

1305 So. 100 E.

Price, Utah 84501

2. Name, title, and address of authorized agent if different from item 1 (Include zip code)

Don S. Hamilton

Permit Specialist

3. TELEPHONE (Area code)

Applicant

(435) 637-8876

Authorized Agent

(435)637-8876

4. As applicant are you? (Check one)

- a. ☐ Individual
b. ☒ Corporation*
c. ☐ Partnership/Association*
d. ☐ State Government/State Agency
e. ☐ Local Government
f. ☐ Federal Agency

* If checked, complete supplemental page

5. Specify what application is for: (Check one)

- a. ☒ New authorization
b. ☐ Renewing existing authorization No.
c. ☐ Amend existing authorization No.
d. ☐ Assign existing authorization No.
e. ☐ Existing use for which no authorization has been received*
f. ☐ Other*

* If checked, provide details under Item 7

6. If an individual, or partnership, are you a citizen(s) of the United States? ☐ Yes ☐ No

7. Project description (describe in detail): (a) Type of system or facility, (e.g., canal, pipeline, road); (b) related structures and facilities; (c) physical specifications (length, width, grading, etc.); (d) term of years needed; (e) time of year of use or operation; (f) Volume or amount of product to be transported; (g) duration and timing of construction; and (h) temporary work areas needed for construction (Attach additional sheets, if additional space is needed.)

See Attached Plan of Development

8. Attach a map covering area and show location of project proposal See Attachment "A"

9. State or local government approval: ☐ Attached ☐ Applied for ☒ Not required

10. Nonreturnable application fee: ☐ Attached ☐ Not required ☒ To Be Determined

11. Does project cross international boundary or affect international waterways? ☐ Yes ☒ No (If "yes" indicate on map)

12. Give statement of your technical and financial capability to construct, operate, maintain, and terminate system for which authorization is being requested.

(Continued on reverse) **This form is authorized for local reproduction.**

13a. Describe other reasonable alternative routes and modes considered.

This was the most reasonable alternative to minimize surface disturbance, & wildlife impacts.

b. Why were these alternatives not selected?

N/A

c. Give explanation as to why it is necessary to cross Federal Lands.

To access and develop federal oil & gas leases.

14. List authorizations and pending applications filed for similar projects which may provide information to the authorizing agency. *(Specify number, date, code, or name)*

N/A

15. Provide statement of need for project, including the economic feasibility and items such as: (s) cost of proposal *(construction, operation and maintenance)*, (b) estimated cost of next best alternative; and (c) expected public benefits.

See Attached Plan of Development

16. Describe probable effects on the population in the area, including the social and economic aspects, and the rural lifestyles.

See Attached Plan of Development

17. Describe likely environmental effects that the proposed project will have on: (a) air quality; (b) visual impact; (c) surface and ground water quality and quantity; (d) the control or structural change on any stream or other body of water; (e) existing noise levels; and (f) the surface of the land, including vegetation, permafrost, soil, and soil stability.

N/A

18. Describe the probable effects that the proposed project will have on (a) populations of fish, plantlife, wildlife and marine life, including threatened and endangered species; and (b) marine mammals, including hunting, capturing, collecting, or killing these animals.

N/A

19. State whether any hazardous material, as defined in this paragraph, will be used, produced, transported or stored on or within the right-of-way or any of the right-of-way facilities, or used in the construction, operation, maintenance or termination of the right-of-way or any of its facilities. "Hazardous material" means any substance, pollutant or contaminant that is listed as hazardous under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. 9601 et seq., and its regulations. The definition of hazardous substances under CERCLA includes any "hazardous waste" as defined in the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, 42 U.S.C. 9601 et. seq. The term does not include petroleum, including crude oil or any fraction thereof that is not otherwise specifically listed or designated as a hazardous substance under CERCLA Section 101(14), 41 U.S.C. 9601(14), nor does the term include natural gas.

No hazardous materials, as defined, will be used, produced, transported or stored within the right-of-way.

20. Name all the Department(s) /Agency(ies) where this application is being filed.

I HEREBY CERTIFY, That I am of legal age and authorized to do business in the State and that I have personally examined the information contained in the application and believe that the information submitted is correct to the best of my knowledge.

Signature of Applicant

*Don S. Hamilton*Date *9-8-78*

Title 18, U.S.C. Section 1001, makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious, or fraudulent statements or representations as to any matter within its jurisdiction.

SUPPLEMENTAL

NOTE: The responsible agency (ies) will provide additional instructions

CHECK APPROPRIATE BLOCK

I - PRIVATE CORPORATIONS

- a. Articles of Incorporation
- b. Corporation Bylaws
- c. A certification from the State showing the corporation is in good standing and is entitled to operate within the State.
- d. Copy of resolution authorizing filing
- e. The name and address of each shareholder owning 3 percent or more of the shares, together with the number and percentage of any class of voting shares of the entity which such shareholder is authorized to vote and the name and address of each affiliate of the entity together with, in the case of an affiliate controlled by the entity, the number of shares and the percentage of any class of voting stock of that affiliate owned, directly or indirectly, by that entity, and in the case of an affiliate which controls that entity, the number of shares and the percentage of any class of voting stock of that entity owned, directly or indirectly, by the affiliate.
- f. If application is for an oil or gas pipeline, describe any related right-of-way or temporary use permit applications, and identify previous applications.
- g. If application is for an oil and gas pipeline, identify all Federal lands by agency impacted by proposal.

* If the required information is already filed with the agency processing this application and is current, check block entitled "Filed." Provide the file identification information (e.g., number, date, code, name). If not on file or current, attach the requested information.

The Privacy Act of 1974 provides that you be furnished the following information in connection with information required by this application for an authorization.

AUTHORITY: 16 U.S.C. 310; 5 U.S.C. 301.

PRINCIPAL PURPOSE: The information is to be used to process the application.

ROUTINE USES: (1) The processing of the applicant's request for an authorization. (2) Documentation for public information. (3) Transfer to appropriate Federal agencies when concurrence is required prior to granting a right in public lands or resources. (4)(5) Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions.

voluntary. If all the information is not provided, the application may be rejected.

DATA COLLECTION STATEMENT

The Federal agencies collect this information from applicants requesting right-of-way, permit, license, lease, or certification for the use of Federal lands. The Federal agencies use this information to evaluate the applicant's proposal. The public is obligated to submit this form if they wish to obtain permission to sue Federal lands.

A reproducible copy of this form may be obtained from the Bureau of Land Management, Division of Lands, 1620 L Street, Rm. 204, Washington, D.C. 20036

APPLICATION FOR TRANSPORTATION AND UTILITY SYSTEMS
AND FACILITIES ON FEDERAL LANDS

GENERAL INFORMATION
ALASKA NATIONAL INTEREST LANDS

This application will be used when applying for a right-of-way, permit, license, lease, or certificate for the use of Federal lands which lie within conservation system units and National Recreation or Conservation Areas as defined in the Alaska National Interest Lands Conservation Act. Conservation system units include the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, and National Forest Monuments.

Transportation and utility systems and facility uses for which the application may be used are:

1. Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.
2. Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.
3. Pipelines, slurry and emulsion systems, and conveyor belts for transportation of solid materials.

Department of Transportation
Federal Aviation Administration
Alaska Region AAL-4, 222 West 7th Ave., Box 14
Anchorage, Alaska 99513-7587
Telephone: (907) 271-5285

NOTE: The Department of Transportation has established the above central filing point for agencies within that Department. Affected agencies are: Federal Aviation Administration (FAA), Coast Guard (USCG), Federal Highway Administration (FHWA), Federal Railroad Administration (FRA).

OTHER THAN ALASKA NATIONAL INTEREST LANDS

Use of this form is not limited to National Interest Conservation Lands of Alaska.

Individual department/agencies may authorize the use of this form by applicants for transportation and utility systems and facilities on other Federal lands outside those areas described above.

For proposals located outside of Alaska, applications will be filed at the local agency office or at a location specified by the responsible Federal agency.

SPECIFIC INSTRUCTIONS
(Items not listed are self-explanatory)

- Item
- 7 Attach preliminary site and facility construction plans. The responsible agency will provide instructions whenever specific plans are required.
 - 8 Generally, the map must show the section(s), township(s) and range(s) within which the project is to be located. Show the proposed location of the project on the map as accurately as possible. Some agencies require detailed survey maps. The responsible agency will provide additional instructions.
 - 9, 10 and 12 - The responsible agency will provide additional instructions.
 - 13 Providing information on alternate routes and modes in as much detail as possible, discussing why certain routes or modes were rejected and why it is necessary to cross Federal lands will assist the agency (ies) in processing your application and reaching a final decision. Include only reasonable alternate routes and modes as related to current technology and economics.
 - 14 The responsible agency will provide instructions.
 - 15 Generally, a simple statement of the purpose of the proposal will be sufficient. However, major proposals located in critical or sensitive areas may require a full analysis with additional specific information. The responsible agency will provide additional instructions.
 - 16 through 19 - Providing this information in as much detail as possible will assist the Federal agency (ies) in processing the application and reaching a decision. When completing these items, you should use a sound judgement in furnishing relevant information. For example, if the project is not near a stream or other body of water, do not address this subject. The responsible agency will provide additional instructions.

Application must be signed by the applicant or applicant's authorized representative.

Public reporting burden for this form is estimated to vary from 30 minutes to 25 hours per response, with an average of 2 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management, (Alternate) Bureau Clearance Officer, (WO-873), 1849 C Street, N.W., Washington, D.C. 20040, and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

If additional space is needed to complete any item, please put the information on a separate sheet of paper and identify it as "Continuation of Item".

PLAN OF DEVELOPMENT

River Gas Corporation
Pipeline, Power Line, & Road Easements
Sections 5, 8, & 9, T.14S., R.9E., SLB&M, Carbon County, Utah

PURPOSE AND NEED FOR THE PROPOSED RIGHT-OF-WAY

The easements addressed in this *Plan of Development* are necessary to allow River Gas Corporation (RGC) to construct roads, pipelines, and power lines through Sections 5, 8, and 9, T.14S., R.9E., to accommodate future development of our existing infrastructure, (see Attachment "A"). The proposed easement would provide access to five proposed wells on private mineral and federal surface. The proposed easements would also allow RGC to further develop private and federal land in the area by providing necessary access to the wells, pipelines, and related facilities to transport personnel, equipment, materials, power, produced gas, and produced water. It would also be used on a continuing basis to access the wells, pipelines and power lines for maintenance and repairs.

The requested easements would consist of approximately 14,100 feet (2.67 miles) in length by 70' in width temporary disturbance (22.66 acres) and 14,100 feet (2.67 miles) in length by 60' in width permanent disturbance (19.42 acres) on Federal acreage. Attachments "B" & "C" show construction details and a typical cross section of RGC's roads (including placement of power lines and pipelines), respectively. Approximately half of the length of the proposed route would consist of reworked existing roads with only 7800' of new construction (except for portions where existing roads would be reclaimed to mitigate for newly created roads as requested by officers of the BLM) and would be used on a permanent basis for the life of the associated wells. The proposed easements would *not* be ancillary to any other Federal right-of-way, but would connect with rights-of-way on patented land and portions of this proposal are inside of the Drunkards Wash Federal Unit.

PROJECT DESCRIPTION

Construction of the proposed Class II road would take place in the Spring and Summer of 1999. During construction of the proposed road, pipelines, and power line, use of the following heavy equipment would be required: water trucks, graders, scrapers, dozers, a track excavator, and a gravel truck. The construction crew would consist of six to eight persons including laborers, equipment operators, and supervisors. Once construction begins, work would continue during daylight hours (and into the night if necessary) throughout the construction months.

During the drilling and completion phase of each well, traffic on the proposed Class II road would consist of frequent use by personnel and supply transport, bulldozers, graders, and water trucks. Large equipment such as the drilling rig, the completion rig, and the fracture treating equipment would be hauled across the road once at the beginning of that equipment's respective project and again at the conclusion of the work. Following the completion of the wells, utilization of the road would be limited to the minimum necessary to maintain and service the wells.

Seasonal access to the proposed route would be year-round in order to maintain the wells in optimal condition.

Alternates to the proposed route have been considered by RGC and determined to be less desirable by agents of the Bureau of Land Management because of surface disturbance and wildlife issues.

A permit is currently being negotiated to cross the Utah Railway easement and a bond is being posted to insure satisfactory completion of the railroad crossing.

WILDLIFE CONCERNS

The route crosses a wildlife area, big game corridor, big game security area and is in an area of critical winter habitat for mule deer and critical winter and high value winter habitat for elk as identified in the Final Environmental Impact Statement (FEIS). RGC has agreed to reclaim and revegetate redundant roads along this route to further enhance habitat, and make reasonable efforts to mitigate for wildlife.

ROAD CONSTRUCTION

Design and construction of the road would adhere to BLM Class II specifications. The existing road would be upgraded, and maintained to BLM Class II specifications. As outlined in the Class II guidelines, the maximum grade would not exceed 10%. The road would be surfaced with approximately 4" of gravel. In addition to the gravel, an armor coating (such as Mag Chloride) would be applied to the road surface for added stability, durability, and dust suppression. The road width would be 27' between borrow pits, and the traveling surface would be 16' to 24' wide (see Attachment "C").

No bridges, retaining walls would be required for this road, however, several minor washes will be crossed in which 18" culverts will be used. No Corps of Engineers 404 dredging permit will be necessary for any of the wash crossings.

FACILITIES CONSTRUCTION

Included within the route would be two buried pipelines and an electric power line. The pipelines would be installed on either the west or south side of the road and the power lines on either the east or north side. Of the two pipelines, one will be a 3 - 18" gas lines and the others 4 - 16" water lines. All pipelines would be constructed of high density, extra-high molecular weight polyethylene conforming to AWWA Standards.

The three-phase power line would be installed by RGC's contractor. Currently the contract for power line installation and maintenance is under negotiation and responsibility for the line would be assumed by whichever party performs the installation.

CONSTRUCTION PROCEDURE

Prior to the beginning of construction, the entire route would be pin-flagged and/or staked. Following the centerline of the staked road, the construction crew would carve out a subgrade to a flat state, stockpiling 4" of topsoil. Then the grader and water truck would pull material from the borrow ditch to the center of the road--building a crown in the center. Culverts would then be installed and pipe materials moved in on both ends of the route. Multiple lengths of plastic pipe would be fused together into 1000' lengths. The 1000' lengths of pipe would then be dragged along the route and placed end to end over the total length of the project and

eventually fused together. Construction equipment used during this phase of the project would include a grader, a bulldozer, a water truck, and a pipe fusion machine.

The pipeline trench would be excavated to a depth of five feet and a width of four feet. Both the water and gas lines would be lowered into the trench using either a front-end loader or a trackhoe. Airvacs and drips would be installed onto the main lines, with manholes and guards placed around both. When ready to fill the trench, and if the fill material were unusually coarse, a finer local material would be bedded around the pipe prior to back filling to protect from damage. The pipeline trench would then be back filled by pushing the fill material into the trench using either a grader, a loader, or a dozer.

A trench would then be excavated (five feet deep by four feet wide) for the electric cable. After the cable were lowered into the trench, back filling would then proceed as outlined above, taking care to avoid damaging the cable.

Next, the road would be dressed and prepped for gravel by the grader and the water truck. Finally, the gravel would be spread and compacted by subsequent passes of the grader and the water truck.

After completion of the road, the disturbed areas outside of the borrow pits would be recontoured and reclaimed based on BLM recommendations. Reseeding would be done with a seed drill and disk using the BLM approved seed mixture. Fertilizer would be distributed using a broadcast spreader.

SAFETY

All OSHA, BLM, and DOGM safety requirements would be followed during the construction process. A 2" barricade, painted safety yellow, would surround each manhole for the airvacs and drips.

STABILIZATION AND MAINTENANCE

Construction debris and trash would be gathered to a centrally located dumpster. The dumpster would be emptied as necessary and the trash to an approved site such as ECDC. A portable toilet would be provided during the construction process and would be hauled away following construction by the owner to his facility.

Maintenance of the route would include (but would not be limited to) grading, snow removal, soil stabilization, and reseeded when necessary. Sufficient culverts and erosion control structures would be included in the project to prevent excessive erosion.

Re: Ritzakis 5-305 Well, 1104' FSL, 1196' FEL, SE SE, Sec. 5,
T. 14 S., R. 9 E., Carbon County, Utah

Gentlemen:

Pursuant to the provisions and requirements of Utah Code Ann. 40-6-1 et seq., Utah Administrative Code R649-3-1 et seq., and the attached Conditions of Approval, approval to drill the referenced well is granted.

This approval shall expire one year from the above date unless substantial and continuous operation is underway, or a request for extension is made prior to the expiration date. The API identification number assigned to this well is 43-007-30474.

Sincerely,

John R. Baza
Associate Director

Conditions of Approval

1. General

Compliance with the requirements of Utah Admin. R. 649-1 et seq., the Oil and Gas Conservation General Rules, and the applicable terms and provisions of the approved Application for Permit to Drill.

2. Notification Requirements

Notify the Division of the following actions during drilling of this well:

- . 24 hours prior to cementing or testing casing
- . 24 hours prior to testing blowout prevention equipment
- . 24 hours prior to spudding the well
- . within 24 hours of any emergency changes made to the approved drilling program
- . prior to commencing operations to plug and abandon the well

Division contacts (please leave a voice mail message if person is not available to take the call):

ACTION CODES (See instructions on back of form)

- A - Establish new entity for new well (single well only)
- B - Add new well to existing entity (group or unit well)
- C - Re-assign well from one existing entity to another existing entity
- D - Re-assign well from one existing entity to a new entity
- E - Other (explain in comments section)

NOTE: Use COMMENT section to explain why each Action Code was selected.

Re: 8th Revision Consolidated Ferron Formation
Participating Area "A,C"
Drunkards Wash Unit
Carbon and Emery Counties, Utah

Gentlemen:

The 8th Revision of the Consolidated Ferron Formation Participating Area "A,C", Drunkards Wash Unit, UTU67921D, is hereby approved effective as of September 1, 1999, pursuant to Section 11 of the Drunkards Wash Unit Agreement, Carbon and Emery Counties, Utah.

The 8th Revision of the Consolidated Ferron Formation Participating Area "A,C" results in the addition of 1,286.07 acres to the participating area for a total of 43,784.53 acres and is based upon the completion of the following wells, as capable of producing unitized substances in paying quantities.

<u>Well No.</u>	<u>API No.</u>	<u>Location</u>	<u>Lease No.</u>
24-183	43-007-30469	NE, 24-14S-8E	UTU61154
5-304	43-007-30473	SW, 5-14S-9E	Fee
5-305	43-007-30474	SE, 5-14S-9E	Fee
8-298	43-007-30475	NW, 8-14S-9E	Fee
18-93	43-007-30587	SW, 18-14S-10E	State
9-329	43-007-30561	SE, 9-15S-9E	State
10-221	43-007-30303	SE, 10-15S-9E	State
1-312	43-015-30350	NE, 1-16S-9E	UTU77351

Copies of the approved request are being distributed to the appropriate agencies and one copy is returned herewith. Please advise all interested parties of the approval of the 8th Revision of the Consolidated Ferron Formation Participating Area "A,C", Drunkards Wash Unit, and the effective date.

**DIVISION OF
OIL, GAS AND MINING**

As the subject wells are producing, this approval requires the submission of a Payor Information Form MMS-4025 to the Minerals Management Service (MMS) within 30 days (30 CFR 210.51). Please notify the designated payor or payors as soon as possible regarding this requirement. Any producing royalties that are due must be reported and paid within 90 days of the Bureau of Land Management's approval date or the payors will be assessed interest for late payment under the Federal Oil and Gas Royalty Management Act of 1982 (See 30 CFR 218.54). If you need assistance or clarification, please contact the Minerals Management Service at 1-800-525-9167 or 303-231-3504.

Sincerely,

/s/ Robert A. Henricks

HAND DELIVERED

Mr. Jim Thompson
Utah Division of Oil, Gas & Mining
1594 W. North Temple
Salt Lake City, UT 84116

Re: River Gas/Phillips Merger

Dear Mr. Thompson:

As you may know, River Gas Corporation ("RGC") merged into Phillips Petroleum Company ("Phillips") effective December 31, 2000 at 11:59 p.m. I have enclosed a Certificate of Articles of Merger issued by the Utah Department of Commerce and, although duplicative, a sundry notice formally evidencing the merger for your records, and a list of all wells, including injection wells, formerly operated by RGC.

Please change the Division's records to reflect the change in operator of these wells from RGC to Phillips. All operational questions should be directed to Phillips at the following address:

Phillips Petroleum Company
Attn: Billy Stacy, Operations Manager
P.O. Box 3368
Englewood, CO 80155-3368
Telephone No.: (720) 344-4984

Phillips currently has a bond on file with the Division (a copy of which is enclosed for your reference), but I understand an \$80,000 Letter of Credit is in the process of being substituted.

Mr. Jim Thompson
January 29, 2001
Page 2

On behalf of Phillips, I thank you for your cooperation. Should you have any further questions or concerns, please do not hesitate to contact me.

Yours very truly,

A handwritten signature in dark ink, appearing to read "F. MacDonald", with a long, sweeping horizontal line extending to the left and a vertical line extending downwards to the right.

CERTIFICATE OF OWNERSHIP AND MERGER

OF

RIVER GAS CORPORATION

(an Alabama corporation)

into

Phillips Petroleum Company

(a Delaware corporation)

It is hereby certified that:

1. Phillips Petroleum Company [hereinafter sometimes referred to as the "Corporation"] is a business corporation of the State of Delaware.

2. The Corporation is the owner of all of the outstanding shares of each class of stock of River Gas Corporation, which is a business corporation of the State of Alabama.

3. The laws of the jurisdiction of organization of River Gas Corporation permit the merger of a business corporation of that jurisdiction with a business corporation of another jurisdiction.

4. The Corporation hereby merges River Gas Corporation into the Corporation.

5. The following is a copy of the resolutions adopted on November 21, 2000 by the Board of Directors of the Corporation to merge the said River Gas Corporation into the Corporation:

"1. Phillips Petroleum Company, which is a business corporation of the State of Delaware and is the owner of all of the outstanding shares of River Gas Corporation, which is a business corporation of the State of Alabama, hereby merges River Gas Corporation into Phillips Petroleum Company pursuant to the provisions of the Alabama Business Corporation Act and pursuant to the

12-12-00P04:02 RCVD

provisions of Section 253 of the General Corporation Law of Delaware.

"2. The separate existence of River Gas Corporation shall cease at the effective time and date of the merger pursuant to the provisions of the Alabama Business Corporation Act; and Phillips Petroleum Company shall continue its existence as the surviving corporation pursuant to the provisions of Section 253 of the General Corporation Law of Delaware.

"3. The Articles of Incorporation of Phillips Petroleum Company are not amended in any respect by this Plan of Merger.

"4. The issued shares of River Gas Corporation shall not be converted or exchanged in any manner, but each said share which is issued immediately prior to the effective time and date of the merger shall be surrendered and extinguished.

"5. Each share of Phillips Petroleum Company outstanding immediately prior to the effective time and date of the merger is to be an identical outstanding share of Phillips Petroleum Company at the effective time and date of the merger.

"6. No shares of Phillips Petroleum Company and no shares, securities, or obligations convertible into such shares are to be issued or delivered under this Plan of Merger.

"7. The Board of Directors and the proper officers of Phillips Petroleum Company are hereby authorized, empowered, and directed to do any and all acts and things, and to make, execute, deliver, file, and/or record any and all instruments, papers, and documents which shall be or become necessary, proper, or convenient to carry out or put into effect any of the provisions of this Plan of Merger or of the merger herein provided for. "

" This Company approves that the effective time and date of the merger herein provided for in the State of Alabama shall be 11:59 p.m. on December 31, 2000."

"Any Vice President, the Treasurer, any Assistant Treasurer, the Secretary, any Assistant Secretary, and each of them severally, be and hereby is authorized to make, execute,

deliver, file, and/or record any and all instruments, papers, and documents which shall be or become necessary, proper, or convenient to carry out or put into effect any of the provisions of these resolutions and to do or cause to be done all such acts as are necessary to give effect to the purpose and intent of the approval herein set forth."

6. This Certificate of Ownership and Merger shall be effective at 11:59 p.m. on December 31, 2000.

Executed on November 27, 2000

NOTICE

Phillips Petroleum Company	:	Oil and Gas
Attn: W. H. Rainbolt, Rocky Mtn. Region-Land	:	
Box 1967	:	
Houston, TX 77251-1967	:	

Merger Recognized

Acceptable evidence has been filed in this office concerning the merger of River Gas Corporation into Phillips Petroleum Company with Phillips Petroleum Company being the surviving entity.

The oil and gas lease files and rights-of-way files identified on the enclosed exhibit have been noted as to the merger. The exhibit is the list supplied by the representative of the companies, and verified by our computerized records. We have not adjudicated the case files to determine if the entity affected by the merger holds an interest in the leases identified, nor have we attempted to identify leases where the entity is the operator on the ground, maintaining no vested record title or operating rights interest. We are notifying the Minerals Management Service and all applicable BLM offices of the merger by a copy of this notice. If additional documentation for a change of operator is required by our Field Offices, you will be contacted by them.

By recognition of the merger the obligor is automatically changed by operation of law from River Gas Corporation to Phillips Petroleum Company on Letter of Credit No. P-207337 (BLM Bond No. UT0829). A rider to BLM Bond No. ES0048 assuming any and all liabilities of BLM Bond No. UT0829 must be submitted for approval to the Eastern States Office, Attn: Bill Forbes, 7450 Boston Boulevard, Springfield, VA 22153. After the rider is approved, the Letter of Credit will be returned to the financial institution that issued it.

Salt Lake City, UT 84114-5801

Gentlemen:

1. Effective December 2, 2002, Phillips Petroleum Company will close its Englewood, Colorado Rocky Mountain Region office. After that time, all correspondence, notices and invoice for Land related matters should be directed to the address(es) noted below. Note that until December 31, 2002, all properties in which Phillips held an interest will continue to be operated by Phillips Petroleum Company, a wholly-owned subsidiary of ConocoPhillips.

2. On December 31, 2002, Phillips Petroleum Company and Conoco Inc. will merge, and the surviving corporation will be renamed "ConocoPhillips Company".

In accordance with the notice provisions of the Operating Agreements and other agreements, if any, between our companies, please adjust your company/organization records, effective for address purposes as of December 2, 2002, and for company name purposes, as of January 1, 2003, to reflect the following information for addressing and delivery of notices, invoicing and payment, and communications with ConocoPhillips Company. This will also apply to Lease Sale notices and other lease-related correspondence and notifications.

U.S. Mail Address:

ConocoPhillips Company
P.O. Box 2197
Houston, Texas 77252
Attn: Chief Landman,
San Juan/Rockies

Physical Address & Overnight Delivery:

ConocoPhillips Company
550 Westlake Park Blvd.
Three Westlake Park
3WL, Room WL 9000
Houston, Texas 77079
Attn: Chief Landman,

SECRETARY'S CERTIFICATE

I, the undersigned, Jennifer M. Garcia, Assistant Secretary of ConocoPhillips Company, formerly Phillips Petroleum Company, organized and existing under and by virtue of the laws of the State of Delaware (the "Corporation"), hereby certify that:

1. As Assistant Secretary I am authorized to execute this certificate on behalf of the Corporation.
2. The attached photocopy of the Certificate of Amendment to the Restated Certificate of Incorporation of Phillips Petroleum Company (to be renamed ConocoPhillips Company) is a true and correct copy as filed in the office of the Secretary of State of Delaware on the 12th day of December 2002, with an effective date of January 1, 2003 and such Certificate of Amendment has not been modified, amended, rescinded or revoked and is in full force and effect as of the date hereof.
3. The attached photocopy of the Certificate of Merger of Conoco Inc. with and into ConocoPhillips Company is a true and correct copy as filed in the office of the Secretary of State of Delaware on the 12th day of December 2002, with an effective date of December 31, 2002 and such Certificate of Merger has not been modified, amended, rescinded or revoked and is in full force and effect as of the date hereof.

IN WITNESS WHEREOF, I have hereunto set my hand as Assistant Secretary and affixed the corporate seal of the Corporation this 7th day of January 2003.

Assistant Secretary
ConocoPhillips Company

CERTIFICATE OF AMENDMENT
to the
RESTATED CERTIFICATE OF INCORPORATION
of

PHILLIPS PETROLEUM COMPANY
(to be renamed ConocoPhillips Company)

Phillips Petroleum Company ("Phillips"), a corporation organized and existing under the General Corporation Law of the State of Delaware (the "DGCL"), hereby certifies that:

1. The amendments to Phillips' Restated Certificate of Incorporation set forth below were duly adopted in accordance with the provisions of Section 242 of the DGCL and have been consented to in writing by the sole stockholder of Phillips in accordance with Section 228 of the DGCL.

2. Phillips' Restated Certificate of Incorporation is hereby amended by deleting Article I thereof and replacing in lieu thereof a new Article I reading in its entirety as follows:

"The name of the corporation (which is hereinafter referred to as the "Corporation") is ConocoPhillips Company."

3. Phillips' Restated Certificate of Incorporation is hereby amended by deleting Section 1 of Article IV thereof and replacing in lieu thereof a new Section 1 reading in its entirety as follows:

"Section 1. The Corporation shall be authorized to issue 2,100 shares of capital stock, of which 2,100 shares shall be shares of Common Stock, \$.01 par value ("Common Stock")."

4. Pursuant to Section 103(d) of the DGCL, this amendment will become effective at 11:00 p.m., Eastern time, on December 31, 2002.

FROM RL&F#1

(THU) 12.12.02 13:32/ST. 13:31/NO. 4864756279 P 6

IN WITNESS WHEREOF, Phillips has caused this certificate to be executed this
12th day of December, 2002.

PHILLIPS PETROLEUM COMPANY

CERTIFICATE OF MERGER

of

Conoco Inc.
(a Delaware corporation)

with and into

ConocoPhillips Company
(a Delaware corporation)

Phillips Petroleum Company, a Delaware corporation to be renamed ConocoPhillips Company prior to the effective time of this certificate of merger (the "Surviving Corporation"), in compliance with the requirements of the General Corporation Law of the State of Delaware (the "DGCL") and desiring to effect a merger of Conoco Inc., a Delaware corporation formerly incorporated under the name Du Pont Holdings, Inc. (the "Merging Corporation," and together with the Surviving Corporation, the "Constituent Corporations"), with and into the Surviving Corporation, and acting by its duly authorized officer, DOES HEREBY CERTIFY that:

First: As of the date hereof, the name and state of incorporation of each of the Constituent Corporations of the merger are as follows:

<u>NAME</u>	<u>STATE OF INCORPORATION</u>
PHILLIPS PETROLEUM COMPANY	Delaware
CONOCO INC.	Delaware

Second: An agreement and plan of merger has been approved, adopted, certified, executed and acknowledged by each of the Constituent Corporations in accordance with the requirements of Section 251 of the DGCL;

Third: The name of the Surviving Corporation will be ConocoPhillips Company;

Fourth: The Certificate of Incorporation of ConocoPhillips Company immediately prior to the merger shall be the Certificate of Incorporation of the Surviving Corporation until such time as it may be amended in accordance with applicable law and the provisions thereof;

Fifth: The executed agreement and plan of merger is on file at an office of the Surviving Corporation, the address of which is 600 North Dairy Ashford, Houston, Texas 77079;

RECEIVED**JAN 08 2003**

DIV. OF OIL, GAS & MINING

Sixth: A copy of the agreement and plan of merger will be furnished by the Surviving Corporation, on request and without cost, to any stockholder of any Constituent Corporation; and

Seventh: Pursuant to Section 103(d) of the DGCL, this certificate of merger will become effective at 11:59 p.m., Eastern time, on December 31, 2002.

Dated: December 12, 2002

ConocoPhillips Company	:	Oil & Gas Leases
P.O. Box 7500	:	
Bartlesville, Oklahoma 74005	:	

Merger/Name Change Recognized

Acceptable evidence was received in this office on January 14, 2003, concerning the change of name of Phillips Petroleum Company to **ConocoPhillips Company** and the merger of **Conoco Incorporated** into **ConocoPhillips Company** on Federal oil and gas leases, with **ConocoPhillips Company** being the surviving entity.

The Secretary of the State of Delaware certified the effective date of this merger effective December 31, 2002.

The oil and gas lease files identified on the enclosed exhibit have been noted to the merger. The exhibit was compiled from a list of leases obtained from your list of leases. Eastern States has not abstracted the lease files to determine if the entities affected by this merger hold an interest in the leases identified nor have we attempted to identify leases where the entities are the operator on the ground maintaining no vested record title or operating rights interest. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of this merger and name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

If you identify other leases in which the merging entity maintain an interest, please contact this office and we will appropriately document those files with a copy of this Notice.

By Operation of law the name of the principal on Nationwide Oil and Gas Bond held by Conoco Incorporated (ES0085) has been changed to ConocoPhillips Company.

If you have any questions, please contact Bill Forbes at 703-440-1536.
